

Comments related to Streetlights
Lighting is good at my place.
Streetlights for North End, Street lights for Ball Diamond/ Playground.
The streetlights we have are adequate. I'm concerned perhaps there could be one at the ball diamond building or our in the field area.
North end of town 2nd St north
X marks where a street light should be.
Proposal to add lights so that each house on the block has a streetlight- a bit overboard. With the proposal there would be 5 lights surrounding my lot. Ridiculous!
<p>I have no problems with the lighting. I do have a pole, with guy wire support, in front of my house. I have cut down two poplar trees that did endanger both the power line and the guy wire.</p> <p>Thanks for your house call and the meeting. It will be interesting to see the ideas that come from this. Soon!! I hope.</p>
<ol style="list-style-type: none"> <li>1. Recommend adding one or two streetlights on 2 St N</li> <li>2. Current Streetlight between Community Hall and Curling rink is in a horrible spot. I have witness getting backed into frequently. I recommend moving it 30-40' west onto the grass area closer to the rink.</li> <li>3. Add one streetlight east of the Hall. It is horribly dark over in that parking area.</li> </ol>
Lighting is good
<p>We do not require and DO NOT WANT any extra lighting deeming over street.</p> <p>Our night sky has already changed due to the elevator.</p>
